

Quiz/Test Retake Policy - 6th Grade Mathematics

Students may choose to retake any quiz or test to try for a better score. To retake a quiz or test, the student will organize a time with me ahead of time so that they may work out the entire assessment again, showing work for every problem on paper. They may gain half credit for each question they correct in this manner.

Quiz/Test Retake Policy - 6th Grade Accelerated Mathematics

Students may choose to retake any/all quizzes per quarter and one test per quarter to try for a better score. To retake a quiz or test, the student will organize a time ahead of time with me so that they may complete a different version of the assessment (same problem types, different numbers). I will keep the highest score between the original and retake assessment.
